I'm a little nervous about listing the map 'Groundwater Flow and Drinking Water Wells' map, as the SE arrow indicating gw flow I put on the map was based on the attached 2014 map from Ex. 6 Personal Privacy (PP) I simply 'transcribed' the southeasterly flow conclusion; I didn't conduct any analysis or have any other reason to indicate this direction of flow. Cheryl, in a past meeting you reacted sort of like we couldn't treat Ex. 6 Personal Privacy (PP) indication of flow direction as conclusive proof. If my assumption that Ex. 6 Personal Privacy (PP) had the flow direction correct was premature, we probably ought to omit the 'Groundwater Flow and Drinking Water Wells' I did from the list.

Everything else looks good to me regarding the work statement and IGCE.

Milo

All: here's the work statement and IGCE for Central Sands. I expect the proposal to exceed our estimate so we may have to make some tough choices and cut some things. Let's hope for the best or for more money to come along. It would be good to get this to the contracting folks tomorrow if possible. Send any comments to me and I'll finalize.

The most pressing task at this point is to get the PR going. Cheryl, you should reach out to Rachel to get it started.

Thanks,
Dean
